INTENSIVE THERAPY PROGRAM

WHAT IS THE PROGRAM ABOUT?

The Intensive Therapy Program is an innovative treatment approach for babies and children with **cerebral palsy and other 'neuromotor challenges'**. It is primarily designed to address the unique and desired goals of each child and the child's family. Intervention is relevant to and focused on the everyday contexts in which your child is engaged or wishes to engage. Therapy will be provided over three or four days by Dr Kate Bain, an experienced Paediatric Occupational Therapist certified in the NDTA Contemporary Practice Model™ and a qualified Neuro-Developmental Treatment Association (USA) Advanced Instructor. The intensive program is designed to complement the child's ongoing regular therapy.

WHAT IS NEURO-DEVELOPMENTAL TREATMENT?

The NDTA Contemporary Practice Model™ is a 'hands-on' therapeutic approach that aims to assist children to increase their independence and participation, at home and in the community, by addressing task-related posture and movement skills and motor learning. Treatment is goal-directed and family-driven; the family and child choose the daily tasks they want to work on improving, and this becomes the focus of the therapy, through measurable functional goals that are assessed before and after treatment each day. Play and engaging activities help to make therapy enjoyable.

HOW DO CHILDREN AND FAMILIES BENEFIT FROM THE PROGRAM?

The program aims to improve the child's independence with daily living skills such as eating, drinking, dressing, personal hygiene and toileting; play and leisure activities; kinder and school related tasks, such as writing, drawing and cutting; mobility and transition skills. Participating families can expect to see improvements toward the chosen goals, and learn how to better assist their child with new and developing skills.

IS YOUR CHILD ELIGIBLE?

The program is open to children with cerebral palsy or other neuromotor conditions aged 0 – 18 yrs who are medically stable **and able to work with a therapist with whom they are not familiar**.

HOW MANY HOURS OF THERAPY DOES EACH CHILD RECEIVE?

The program is provided at Health Sciences, Southern Cross University, Gold Coast, QLD where, ideally, your child will receive two sessions a day with each session being 2 hours duration. In addition, our therapist visits families in their home to provide a minimum of four hours therapy a day over three days (for further information go to <http://paediatricworkshops.com.au/intensives-families>).

PROGRAM COST

Dr Bain is registered NDIS provider in several States. Session fees are charged according to the current NDIS and approved rates for occupational therapy. Dr Bain also has a current HIC number (for health insurance claims). For families who are self-funding the treatment program, payment can be made by Direct Debit. Please contact us if you would like to enrol your child, but are not eligible for any funding support, as we may be able to assist you with payment by instalments.

HOW TO REGISTER YOUR CHILD FOR THE PROGRAM

Please register your interest in this program with Dr Chris Porter (Manager) on 0412 751741 or via pw@paediatricworkshops.com.au. You will be sent an application form to complete and return. The treating therapist will review the applications received and you will be informed as to whether your child has been accepted into the program. If your child is accepted, you will receive an information package that will contain all the details you require prior to attending.
