

NDT TREATMENT INTENSIVE/ PROFESSIONAL DEVELOPMENT 'IN YOUR WORKPLACE'

5 days of Intensive NDT Treatment for Babies & Children

Functional Outcome Measurement

Daily NDT Instruction for therapists

Additional 1 day NDT workshop

- This Paediatric Workshops initiative offers five days of individual, intensive NDT treatment to address the functional goals of families & children with cerebral palsy.
- Internationally recognised [NDTA™ \(USA\)](#) certified Advanced Instructors / paediatric therapists, are available to treat children at home or at a venue of their choice.
- Performance of the family-selected functional goal will be recorded in video & GAS goals before and after treatment ([refer to this recent article for further information on this methodology](#)).
- Daily instruction for therapists at the facility will include an NDT theoretical component with practical NDT 'lab experiences'. Facility therapists may observe any of the treatment sessions.
- On the sixth day, there will be an NDT workshop that will also be open to therapists from outside the participating workplace. In this workshop:
 1. The functional goals / NDT treatment strategies utilised & the functional outcomes for the children involved in the Intensive will be examined in depth and related to the topic: 'The Evidence Base of NDT?'
 2. Functional 'Carryover' opportunities for home, school, preschool etc, as addressed with families and therapists will be summarised.

Contact Dr Kate Bain if you are interested in this opportunity.
